**My Website:** [magentacuda.com](http://magentacuda.com)

**WordPress.org:** [Magenta Cuda](#)

**GitHub:** [Magenta Cuda](#)

**Contact Me:** [magentacuda.com/contact-me/](http://magentacuda.com/contact-me/)

Dear Possible Employer,

I am a former Microsoft Excel VBA spreadsheet developer. As a pastime over the last five years, I have written seven **WordPress** plugins using **PHP 5.6**, **MySQL**, **HTML5**, **CSS3**, **JavaScript**, **jQuery**, **WordPress REST API**, **Backbone.js**, **Modernizr**, **Bootstrap 3** and **Sass**. I am looking for work as a **website customizer** or **technical support specialist**. I want to work remotely.

I have working knowledge of **Apache 2.4**, **WordPress Multisite**, **Yoast SEO**, **Google Analytics**, **W3 Total Cache**, **Contact Form 7**, **MailChimp** and **Jetpack by WordPress.com**. I know how to use **mysql**, **mysqldump**, **curl**, **openssl**, **WP-CLI**, **cPanel**, **FileZilla**, **phpMyAdmin**, **Bitwise**, **Google Chrome Developer Tools**, **validator.w3.org**, **GTmetrix**, **WinCacheGrind**, **EasyPHP** and **bluehost**.

### My WordPress Plugins

- [Backbone Bootstrap Gallery](#)
- [Search Widget and WP REST Server for Toolset Types](#)
- [Database Debugging Tools for Developers](#)
- [A Shortcode Tester](#)
- [A Tiny Post Content Template Interpreter](#)
- [Tags for Media Library](#)

**Backbone Bootstrap Gallery**([Demo](#))([GitHub](#)) uses Bootstrap, Backbone.js and the WP REST API to implement a responsive, mobile-friendly, plug-compatible replacement for the built-in WordPress gallery shortcode. **Search Widget and WP REST Server for Toolset Types**([Demo](#))([GitHub](#)) implements a search widget and a WP REST API server for [Toolset Types](#). **Database Debugging Tools for Developers**([Docs](#))([GitHub](#)) is a WordPress database tool for diffing database tables against a previous backup. **Tags for Media Library**([Demo](#))([GitHub](#)) supports image galleries based on taxonomy tags.

Sincerely,

---

Magenta Cuda
