Contact Me: magentacuda.com/contact-me/

Dear Possible Employer,

I am a former Microsoft Excel VBA spreadsheet developer. As a pastime for the past five years, I have been writing **WordPress** plugins using **PHP 5**, **MySQL**, **HTML5**, **CSS3**, **JavaScript**, **jQuery**, **Backbone.js**, **Bootstrap 3** and **Sass**. I am looking for work as a WordPress site customizer or technical support specialist. I have a physical disability and want to work remotely.

I have working knowledge of **WordPress REST API**, **jQuery UI**, **jQuery Mobile** and **Modernizr**. I know how to configure **Apache** and **WordPress Multisite**. I know how to use **JSHint**, **WinCacheGrind**, **validator.w3.org**, **SlikSVN**, **Git**, **composer**, **mysql**, **mysqldump**, **curl**, **openssl**, **WP-CLI**, **cPanel**, **FileZilla**, **phpMyAdmin**, **Bitvise**, **bluehost** and **EasyPHP**.

My WordPress Plugins

- [Tags for Media Library](#)
- [Backbone Bootstrap Gallery](#)
- [Search Widget and WP REST Server for Toolset Types](#)
- [Database Debugging Tools for Developers](#)
- [Simple Variations for WooCommerce](#)
- [A Shortcode Tester](#)
- [A Tiny Post Content Template Interpreter](#)

Tags for Media Library([Demo](#))([GitHub](#)) supports image galleries based on taxonomy tags. **Backbone Bootstrap Gallery**([Demo](#))([GitHub](#)) uses Bootstrap, jQuery Mobile, Backbone.js and the WP REST API to implement a responsive, mobile-friendly, plug-compatible replacement for the built-in WordPress gallery shortcode. **Search Widget and WP REST Server for Toolset Types**([Demo](#))([GitHub](#)) implements a search widget and a WP REST API server for [Toolset Types](#). **Database Debugging Tools for Developers**([Docs](#))([GitHub](#)) is a WordPress database tool for diffing database tables against a previous backup. **Simple Variations for WooCommerce**([Demo](#)) is an extension for WooCommerce where the variations of a Variable product are defined by a selection of components.

Sincerely,

Magenta Cuda
